# VELAKU PLUG-INS

## VERSUS

## OUT-OF-THE-BOX MICROSOFT 365

### VELAKU PLUG-INS ARE SIMPLE IN CONCEPT, ELEGANT IN EXECUTION.

### DESIGNED TO SAVE YOU TIME AND EFFORT.

| Velaku | Microsoft |
|---|---|
| **Velaku QuickStarts** are over a dozen pre-built SharePoint pages on steroids. Each includes page design, navigation menus, pre-populated term store, fully configured webparts and more. | SharePoint comes with 3 generic page layout templates. You'll need to configure them - build page design, meta tagging schema, term store data and all site elements. |
| **Velaku Broadcast** publishes content across multiple channels with one click. | Not available from Microsoft. Workaround: Manually post content to each channel. |
| **Velaku Syndicate** lets you post an "ad" in one place, and have it automatically appear elsewhere | Not available from Microsoft. Workaround: Manually update your "ad" on each page. |
| **Velaku Curate** continously pulls relevant content from multiple places into SharePoint pages. Easy to use intuitive tagging process with unlimited terms and topics. | Microsoft pulls content based on a tagging system that has limited scope and is hard to use. |
| **Velaku Site Mapper** displays an intuitive SharePoint sitemap based on all your site collections. | Not available from Microsoft. Workaround: View the sitemap as a long list of links. |
| **Velaku My Links** is a centralized, customizable list of links or bookmarks that can be seen anywhere. Perfect for field workers. | Not available from Microsoft. Workaround: Manually create links on each SharePoint page. |
